

Illustra 625 PTZ Camera

High Performance/Full 1080p High-Definition (HD)

Features That Make a Difference:

- Ultra-low latency for accurate camera tracking control - analog precision in an HD IP PTZ camera!
- Fastest HD PTZ in the industry moves to position at 512° per second
- Efficient bandwidth use to reduce network traffic and save on storage costs
- 2MP with dual streams at full 1080p 30ips resolution
- Freeze frame between presets to save on bandwidth and storage
- Real-time continuous auto focus
- Outstanding color reproduction
- Easy to install
- Progressive scan imager with full digital path to output
- Create events with RTP meta-data streaming

Indoor

Outdoor

The Illustra 625 PTZ camera, both indoor and outdoor, is an ideal choice for businesses that require a high-performance, high-definition (HD) PTZ camera. With sophisticated PTZ control mechanisms for ultra-low latency performance, the camera tracks with the precision and accuracy of an analog PTZ camera.

The high-speed Illustra 625 PTZ camera is excellent for any site where locating, tracking and zooming in on the details of a subject are critical. When using automated presets, programmed tours or manual control to track and zoom in on the suspect, the Illustra 625 PTZ camera delivers premium performance. The camera's multiple, full digital path streams in H.264 or MJPEG 30ips are enabled over an entirely digital path resulting in the delivery of the highest quality video.

The Illustra 625 PTZ camera is the fastest HD PTZ in the industry. With DC servo motors and exceptional gearing and braking designs, the Illustra 625 PTZ camera delivers pan and tilt speed performance and accuracy that surpass the maximum speed and return-to-position accuracy of all competitive PTZ cameras. When using programmed presets and tours, the Illustra 625 PTZ camera moves to position at an amazing 512° per second. When using the camera in automated modes, the Illustra 625 PTZ camera delivers HD video from scene to scene in fractions of a second.

The true differentiators of this PTZ camera's speed are accuracy and precision. With an accuracy rating of +/- 0.25° the camera will continually return and deliver video of the scenes that are set. By using the freeze frame feature between presets and tours, the Illustra 625 PTZ camera minimizes network bandwidth use and storage costs by automatically eliminating unusable video of a scene created when the camera moves between presets.

The camera uses ZAP (zoom adjusted program) technology that automatically controls the pan and tilt speed of the camera in proportion to the amount of zoom used.

The Illustra 625 PTZ camera uses the latest technology and H.264 compression to deliver bandwidth that is a fraction of the bandwidth used by competitive 1080p HD PTZ cameras. This will reduce network traffic and save on storage costs.

The Feature Plus models of the Illustra 625 PTZ use the SD card for video alarm storage and audio output pre-recorded clips. The Feature Plus models can provide bi-directional audio, alarm inputs, and auxiliary outputs where necessary.

The Illustra 625 PTZ camera's "future-proof" hardware platform allows you to update the camera's firmware with analytics and feature enhancements as they become available. These include events, motion detection, advance health monitoring and edge recording.

Features

ONVIF 2.2 Profile S

The Illustra 625 PTZ camera supports the complete feature set of the ONVIF 2.2 profile S specification allowing for highly capable integration on recording platforms that support this specification.

Ultra-low Latency and Accurate Motion Control

The Illustra 625 PTZ camera has a unique combination of high-performance video processing hardware and precision direct-drive motors with smooth motor control. This delivers precise pan and tilt control with ultra-low latency. The camera supports 96 programmable presets and moves to presets with sustained accuracy at a speed of 512° per second.

Easy Installation

The Illustra 625 PTZ camera is supported by the latest version of the Illustra Connect camera configuration software. Using Illustra Connect, batch setup features for IP address assignment makes the setup of multiple cameras automatic.

Along with several PTZ mounting options, the Illustra 625 PTZ camera is compatible with the Illustra 600 Series Mini-Dome mounts and many of the existing IP SpeedDome Outdoor mounts. So if you're upgrading an existing IP SpeedDome camera to the new Illustra 625 PTZ camera, it is likely you can use the camera mount already installed.

The Indoor 625 PTZ camera comes with a unique twist and click lock ring saving time and money for every camera installed. Simply insert the camera into the mount, twist and click into place.

Indoor Bubble Cover and Mounting Options

Bubble Cover

ADCi625-P132 ADCiPTZINDWCLR

Available in black or white with clear or smoked bubble

Wall Mount

ADCi625-P132 ADCiM6WALLBK ADCi625-P132 ADCiPTZINDWCLR ADCiM6WALLWK

Available in black or white and can be used with a black or white bubble, cover with clear or smoked bubble cover

*Flush Mount with Bubble

ADCi625-P132 ADCi6PFMKIWC

Lowest profile indoor installation with only 4.5" visible below the ceiling

Bubble available in clear or smoked with white or black trim ring

Gooseneck Mount (with Pendant Cap)

ADCi625-P132 ADCi6DPCAPOB ADCBMARM ADCi625-P132 ADCiPTZINDWCLR ADCi6DPCAPOW ADLOMARM

Available in black or white, and can be used with black or white bubble cover with clear or smoked bubble
