ST-PK

Programming Cable Kit

The ST-PK is a programming cable kit for SmarTouch™ wireless touchpanels and many Isys® touchpanels. It is used only for loading touchpanel files, updating firmware, and configuring the touchpanel prior to operation.

The ST-PK may also be used to update firmware and adjust the digital audio signal processing in Crestron's 7.1 surround sound processors and room solution boxes.

SPECIFICATIONS

Cables

3.5mm to RJ11 Cable Assembly (CNSP-585): Provides connection between a SmarTouch wireless touchpanel and the control processor via a RJ11 Cresnet port; may require an additional CNRJ11, ST-CNB, or C2N-HBLOCK accessory. **RJ11-to-RJ11 Cable plus RJ11-to-DB9F Adapter (STCP-502):** Provides connection between an Isys touchpanel, surround processor, or room solution box RS-232 port and PC COM port.
