

Ax40W8 1MP 8mm Wedge i3 Part# C-Ax40W8

Features

- Delivers 1 Megapixel resolution (1280x780) at 30 frames per second
- 8mm fixed lens
- PoE
- H264-MJPEG
- IP66
- A low profile IP camera, only 46 mm (1.8 inches) in height

Application & Benefits

The Ax40W48 provides 8mm fixed lens focus ready for a simple installation. Ax40W series camera offers 720P, a progressive HDTV signal format with 720 horizontal lines and an aspect ratio of 16:9.

The Ax40W series is a low profile IP camera, only 46 mm (1.8 inches) in height which makes it very effective for discreet security installations. This camera series delivers 1 Megapixel resolution (1280x780) at 30 frames per second. In addition, the Ax40W supports MJPEG compression, which provides flexibility to meet various system requirements as well as h.264 compression allowing the video to transfer quicker over the Internet.

Built-in support for Power-over-Ethernet reduces cost and adds flexibility to the camera. A single cable connection is used to power, view, and control the camera. Installation cost is reduced since there is no need for separate cable installation. A 12 VDC is also available for installations that may require separate power.

The Ax40W is ideally suited for use within the video surveillance and security industry. It is made for both indoor and environments and works well with i3 software applications: SRX-Pro, iDisplay, Video Pilot and VideoLogix.
